Why is it 161 questions?

The real test consists of 150 test questions and 10 pilot questions; totaling 160 questions. You won't know which 10 of the 160 questions are pilot questions so you have to be able to answer all 160 questions in the 4-hour testing window.

We here at SNABA like to go the extra mile. Some say we are #extra but we don't care. This being said, we decided to add the cherry on the top: that one extra question.

We know that if you can answer 161 questions in the allotted time, you'll be ready to kick the test's ass when the time comes. #yougotthis

Sooo... what's included?

- 161 test questions that simulate the actual exam.
- A detailed distribution of practice questions from each area of the task list.
- You can pause and resume the test .
